

Solve.

$$\begin{array}{r} 1. \ 6,781 \\ \quad 8,961 \\ \quad 4,826 \\ + 1,092 \\ \hline \end{array}$$

$$2. \ 5\frac{1}{8} - \frac{1}{2} =$$

$$3. \ \begin{array}{r} 9,950 \\ \times \quad 28 \\ \hline \end{array}$$

$$4. \ 5.9 \overline{)216.27}$$

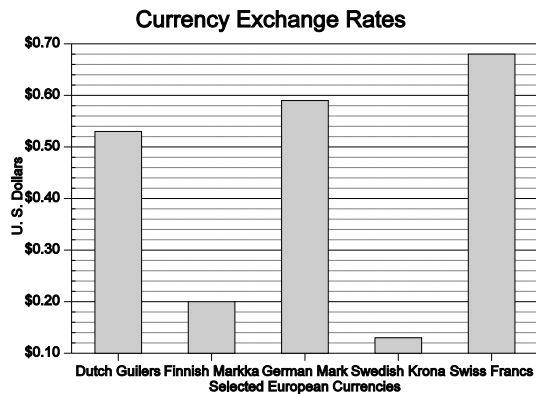

Tuesday

5. Circle the prime numbers.

- 11 12 13 14 15 16 17 18 19

Answer the questions about the graph.

6. Are three krona worth more or less than one markka?

7. If the price of dinner in a German restaurant was 15 marks, would that be more or less than 15 dollars?

8. A British pound is worth 1.61 U. S. dollars. Would two Swiss francs be worth more or less than one pound?

1. On a separate piece of paper, place the following facts about England in an outline.

- Farmers raise barley, oats and potatoes.
- Fisherman catch cod, haddock and herring.
- Factories produce chemicals, ships and textiles.
- Chalk, coal and iron ore are mined in Britain.
- Sheep, pigs and poultry are raised by farmers in England.
- Glassware, electrical goods and motor vehicles are manufactured in England.

On a separate sheet of paper, diagram the following sentences. (See the "Grammar Helps" page for diagramming help. If you have never been taught how to diagram, label each word in the sentence as one of the eight parts of speech.)

2. England's form of government is a constitutional monarchy.
3. The English people have many old customs and respected traditions.
4. At one time, England had many colonies throughout the world.
5. The country of England is on an island and has a moderate climate.

Think! Can you name 13 former colonies of England?
